7/10
high risk

TUMBLING RISK Medium
DOMAIN RISK SCORE Low

Powered by AtData, the industry's leader in email intelligence, CRS Fraud Finder analyzes billions of real-time email signals to deliver a cost-effective, API-ready solution that stops fraud in its tracks – including synthetic IDs, account takeovers, and transactional abuse.

Email Intelligence

•

Real-Time Decisions

•

Reduced Fraud

•

Frictionless Approvals

Whether you're onboarding new users, verifying transactions, or reviewing account changes, CRS Fraud Finder gives your team the confidence to act quickly, accurately, and securely.

Why CRS Fraud Finder Works

NEXT-GEN SIGNALS

Access deep behavioral and historical insights from the world's largest email recognition network – including email age, velocity, domain risk, IP matching, and fraud consortium data.

SEAMLESS INTEGRATION

Our API plugs into your onboarding or transaction flow to deliver real-time risk scoring at sign-up, checkout, and customer updates – with no disruption to your current system.

DECISION-READY DATA

Every call returns structured, actionable data to help you automate fraud reviews, reduce operational load, and accelerate approvals for good users.

Eliminate Fraud

Continuous, real-time monitoring from onboarding to checkout – powered by over 4 billion monthly email signals.

Smarter Approvals

Let real customers sail through. Advanced risk scoring minimizes false positives and boosts approval rates for legitimate users.

Proven Expertise

Backed by 20+ years of email innovation. AtData's email intelligence meets CRS's legacy in credit and compliance.
